## Experience

### CódiGol

[codigol-demo.netlify.app/](https://codigol-demo.netlify.app/)

React · Tailwind CSS · JavaScript · Clerk

Developed in 10 days for the MiduDev 2025 Hackathon, which received a Special Mention for Originality in the Hackathon final broadcast, Códigol is an educational game that turns learning Tailwind CSS into a fun and progressive experience. It uses visual challenges with soccer-inspired mechanics to teach design through utilitarian lessons.

### LandingMine

[landingmine.netlify.app](https://landingmine.netlify.app)

React · Tailwind CSS

A gallery of 19 themed landing pages that demonstrates web design versatility and mastery of Tailwind CSS. Each page explores a distinct visual approach, focused on the rapid and efficient creation of modern interfaces, addressing the need for reusable landing pages for a variety of products or services.

### Cosmic Pizza

[github.com/FernadoCodeDev](https://github.com/FernadoCodeDev)

JavaScript · PHP · Arquitectura MVC · JSON

Internal management and reservation platform for high-demand businesses such as restaurants, movie theaters, and clinics. Includes authentication, an administrative dashboard, a date- and table-based reservation system, and a custom API. Solving the comprehensive management of reservations, content, and operations from a single, scalable system.

### Keys Homes

[keyshome.atwebpages.com](https://keyshome.atwebpages.com)

PHP · MySQL · JavaScript · SASS

Real estate platform for publishing, managing, and editing properties. Developed with a PHP backend and MySQL database, it features a customizable interface and scalable structure. Solving the need for automated online property management with easy editing and future expansion.

## Languages

### Spanish

Native

### English

Intermediate B1

## Technical skills

### Front-End

- JavaScript
- TypeScript
- React
- Bootstrap
- SASS
- Tailwind CSS

### Back-End

- PHP
- Laravel
- Python
- Node.js

### Databases

- MySQL
- SQLite
- PostgreSQL

### Tools

- Git
- GitHub
- Figma
- Postman
- Docker

### Development practices

- Diseño y modelado de bases de datos relacionales
- Herramientas de modelado E-R
- Desarrollo responsive
- MVC (Modelo-Vista-Controlador)
- CRUD (Create, Read, Update, Delete)
- RESTful APIs
